

We Automate Pools!

ALL-IN-ONE CONTROL PANELS

To Operate your Pool/Spa Equipment, Lights, Water Fall, and Fountain

Preserve and protect your hard earned dollars with our energy saving Control Panels. Your equipment and lights operate only as long as they have to, and they will last longer too. Your Pool Professional can help you choose the right panel to control any combination of pool equipment. Filtration pump, heater, cleaner, chemical feeder, pool lights and even your yard lights all can be integrated into one automatic system so your pool or spa is always ready when you are. And, when you go away for weekend or a long vacation, you can set your mind at ease – your system is under control because Intermatic is in control.

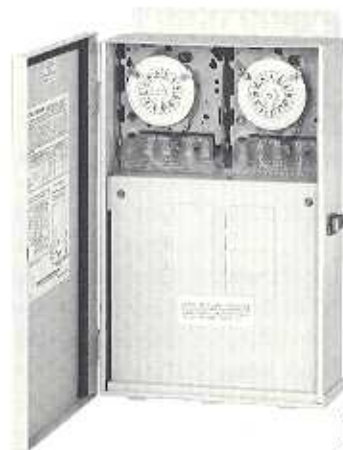

QUALITY FEATURES

- Rugged steel enclosure keeps out rain, sleet, dust and insects
- Safe and simple to operate
- Clear, easy to follow instructions
- Heavy duty relays and switches
- Industry's most reliable time clock
